Notifications, comms and emails

The school prefers to send plain text emails for day to day communications, which, when an MCAS account is set up (and notifications on the app turned on) appear as a push notification and message within MCAS.

If using an iPhone, your default notification settings should be like the screenshot below. To be more forceful, banners can also be changed to 'persistent' which means they will keep showing up until actively dismissed.

Those parents without registered accounts on MCAS will receive an email instead.

More formal letters, or those with pictures and links will be sent by email only.
